- ✱ Turn Your Wheels into Winches.
- ✱ 4 Tonne Harness - 4.5m Long
- ✱ Attaches to the Bogged Wheel
- ✱ Anchor Other End to Fixed Point
- ✱ Drive Out Forward or Reverse

**Sand**  
**Mud**  
**Snow**  
**4x4**  
**Car**  
**Tractor**  
**Custom Design**

#### Method ONE - Connect through rim

##### READ SAFETY TIPS FIRST

Attach 'short tails' end to wheel by passing 1 red connector tie through rim. Tie firmly to the tails using simple sheet bend knot. Ensure wheel can rotate freely without catching on steering or brake parts.

#### Method TWO - Form a snare

##### READ SAFETY TIPS FIRST

Attach 'long tails' end around wheel by passing BOG OUT device over the tyre & pulling the tails back along the ground. Using the 2 red connectors, tie each of the 'long tails' ends back to the BOG OUT (making a snare).

Attach other end of BOG OUT to a suitable anchor point and drive SLOWLY out of bog.
